Ambrin

B2B2C Counselling & Wellness Platform

Commercial Proposal | App Flow | Pricing

Prepared by Indic Labs | March 2026

AI-First Development • Startup-Friendly Pricing • Zero Hidden Costs

Executive Summary

Ambrin is a B2B2C counselling and wellness platform designed for schools, colleges, and corporate organizations. The platform enables organizations to provide structured mental health support to their students and employees.

How It Works:

- Organizations (schools/corporates) subscribe to Ambrin and receive unique organization codes
- Users (students/employees) sign up using their organization code
- Users get access to: self-assessments, breathing exercises, theory sessions, counsellor profiles, session booking, and analytics
- Admins manage everything: organizations, users, counsellors, content, assignments, analytics

Three Platforms, One Backend:

- Web Application (Next.js) -- Full admin + user features
- Android Application (React Native/Expo) -- User features + push notifications
- iOS Application (React Native/Expo) -- User features + push notifications
- All three apps share a single Node.js backend API and MySQL database

"When You Grow, We Grow" -- Year 1 maintenance is FREE. We only earn when you earn.

User Journey

The complete experience for students and employees using MindCare

#	Screen	Description
1	Onboarding	3-slide intro showcasing platform features and benefits
2	Login	Enter organization code + email + password to access
3	Dashboard	Greeting, mood check-in, quick actions, assigned tasks
4	Assessment	Question-by-question quiz flow, auto-scored with results
5	Breathing	Animated circle breathing guide with inhale/hold/exhale phases
6	Theory	Educational modules with progress tracking and completion
7	Counsellors	Browse counsellor profiles with ratings, tags, and specialization
8	Book Session	Select counsellor, pick date, choose time slot, confirm booking
9	Analytics	Personal scores, mood trends, category-wise breakdown charts
10	Profile	Avatar, stats, theme toggle (dark/light), sign out

Admin Journey

Complete management dashboard for platform administrators

#	Section	Description
1	Dashboard	Real-time KPIs: total users, active sessions, counsellors, completion rates
2	Organizations	Create and manage organizations with unique codes and settings
3	Users	Search, filter, edit user profiles, toggle active/inactive status
4	Counsellors	Add counsellor profiles, set availability, manage specializations
5	Questionnaire	4-step builder: Categories > Levels > Questions > Build Quiz
6	Theory	Create theory sessions with modules, duration, and publish controls
7	Breathing	Add breathing exercises with customizable timing and phases
8	Assignments	Assign tasks to specific classes, departments, or individuals

#	Section	Description
9	Behavior Log	Log student behavior incidents, flag for counselling referral
10	Bulk Register	CSV upload for mass user registration with error reporting
11	Analytics	Platform-wide statistics, counsellor load, CSV export

Additional Roles:

- Teachers: View assigned students, log behavior incidents, flag students for counselling
- Counsellors: Manage their schedule, view bookings, maintain session notes

What You Get

Complete feature comparison across all three platforms

#	Web App Features	Android + iOS App Features
1	Admin Dashboard with KPIs	User Dashboard with mood check-in
2	Organization Management	Assessment quiz flow
3	User Management (CRUD)	Breathing exercises with animation
4	Counsellor Management	Theory sessions with progress
5	Questionnaire Builder (4-step)	Counsellor directory and profiles
6	Theory Session Management	Session booking system
7	Breathing Exercise Management	Personal analytics and charts
8	Assignment System	Mood logging and tracking
9	Behavior Logging	Push notifications (Firebase)
10	Bulk CSV Registration	Biometric login (fingerprint/face)
11	Analytics with CSV Export	Offline content caching
12	User-facing features (all)	Published on Google Play Store
13	Role-based access control	Published on Apple App Store
14	Dark/Light theme support	Deep linking for shared URLs

Budget Breakdown

Transparent pricing for every component of the platform

Component	Cost
Backend API (Node.js + Express + Prisma)	₹12,000
Web Frontend -- Admin Dashboard	₹10,000
Web Frontend -- User Interface	₹8,000
B2B2C System (Orgs, Roles, Assignments)	₹10,000
Android App (React Native/Expo)	₹6,000
iOS App (React Native/Expo)	₹6,000
Database Design & Testing	₹4,000
Deployment & DevOps	₹4,000

TOTAL: ₹60,000

Market rate for similar platforms: ₹5-8 lakhs. We deliver at ₹60,000 through AI-first development, passing cost savings directly to you.

Infrastructure Costs (Paid by Client):

Service	Cost	Notes
Oracle Cloud (Server)	₹0/month	Free tier -- handles up to 50 organizations
Google Play Store	₹2,100 one-time	One-time developer registration fee
Apple App Store	$99/year (~₹8,300)	Annual developer program fee
Firebase + SSL	₹0/month	Free tier for notifications and security

Payment Plan

Simple EMI-style payments -- pay as we build

₹10,000/month x 6 months = ₹60,000 Total

Month	Payment	Deliverable
Month 1	₹10,000	Project kickoff, backend foundation, database setup
Month 2	₹10,000	Core features development (assessments, breathing, theory)
Month 3	₹10,000	B2B2C system + admin features + org management
Month 4	₹10,000	Android app development + testing
Month 5	₹10,000	Deployment + QA + web & Android launch
Month 6	₹10,000	iOS app development + App Store submission

No large upfront payment. Pay as we build. First payment due before commencement.

Maintenance Pricing

Ongoing support to keep your platform running smoothly

FREE for Year 1

Key Points:

- First year maintenance is completely FREE

What's Included in Maintenance:

- Bug fixes and security patches
- Server monitoring and health checks
- Database backups (daily)
- Email support (24-48 hour response time)
- Platform updates and improvements
- SSL certificate management
- Performance monitoring and optimization
- Onboarding support for new organizations

Total Cost Summary

Everything you need to know about the total investment

Item	Cost	Frequency
Platform Development (Web + Android + iOS)	₹60,000	₹10,000 x 6 months
Google Play Store	₹2,100	One-time

Item	Cost	Frequency
Apple App Store	₹8,300 ($99)	Annual
Server Hosting (Oracle Cloud)	₹0	Free tier
Year 1 Maintenance	FREE	Included

Year 1 Grand Total: ₹70,400 (₹60,000 + ₹2,100 + ₹8,300)

That's just ₹5,867/month for 3 complete platforms!

When You Make Money, We Make Money

Our growth model is aligned with your success

Year 1 maintenance is FREE. We only earn when you earn.

- **Zero Risk Start:** Pay ₹10,000/month during development. No large upfront cost.
- **Free Year 1:** No maintenance fee until your platform is generating revenue.
- **Fair Trigger:** Maintenance starts only after first org onboards -- not from contract date.
- **Three Platforms:** Web + Android + iOS. One price. One backend.
- **AI-First:** 3x faster delivery. Cost savings passed to you.
- **Full Ownership:** 100% source code. No vendor lock-in.

Development Timeline

13-week delivery plan from kickoff to full deployment

Phase	Timeline	Deliverables
Foundation	Week 1-2	Auth system, database schema, design system, project setup
Core Features	Week 3-4	Assessments, breathing exercises, theory sessions, counsellors
B2B2C System	Week 5-6	Organizations, roles, bookings, assignments, behavior logs
Android App	Week 7-8	React Native build, push notifications, all user features
Deploy & Launch	Week 9	Oracle Cloud setup, Play Store submission, web app live
iOS App	Week 10-13	iOS build, App Store submission, final QA

App Architecture:

```
Client's Server (Oracle Cloud Free)
├── Web App (Next.js static)      →  app.mindcare.in
├── API (Node.js + Express)       →  api.mindcare.in
└── MySQL Database
Google Play Store
└── Android App (React Native/Expo)
Apple App Store
└── iOS App (React Native/Expo)
All 3 apps → Same API → Same Database
```

Terms:

- Development fee: ₹10,000/month x 6 months
- First payment due before commencement
- Year 1 maintenance: FREE (starts from first org onboarding)
- Cancellation: 30-day written notice

Let’s Build Something Great Together.
